# March 2017 Newsletter

Staff and Student Timetables to Calendars

Would you like your Staff and/or Students to be sent their timetable. Now Denbigh can easily email a .ics file and update any calendar with the timetable.

When there are any changes just send the link again and it will update the calendar with the new lesson times or changes.

Attention IT Managers!

As you may be aware, FileMaker Server installs and runs in a version of Java, and the installer for the relevant version of Java is included in the FileMaker Server installation.

It is critical that Java versions are NOT updated unless it is part of a FileMaker Server update, running any other version of Java than FileMaker specify is not supported and will likely break web publishing capabilities. Please ensure that the Java control panel on your FileMaker Server machine is not set to automatically update, and put a policy in place to prevent standalone Java updates on your FileMaker Server.
